

FAUSTO MIGUEL ROMO GUEVARA A COFFEE GROWER WHO KEEPS A FAMILY TRADITION ALIVE FROM THE HEART.

Fausto Romo is a producer who, 25 years ago, decided to acquire his farm, *La Carolina*. Although the farm's original purpose was dairy farming, Fausto ventured into specialty coffee after his uncle introduced him to different coffee varieties and the concept of quality coffee.

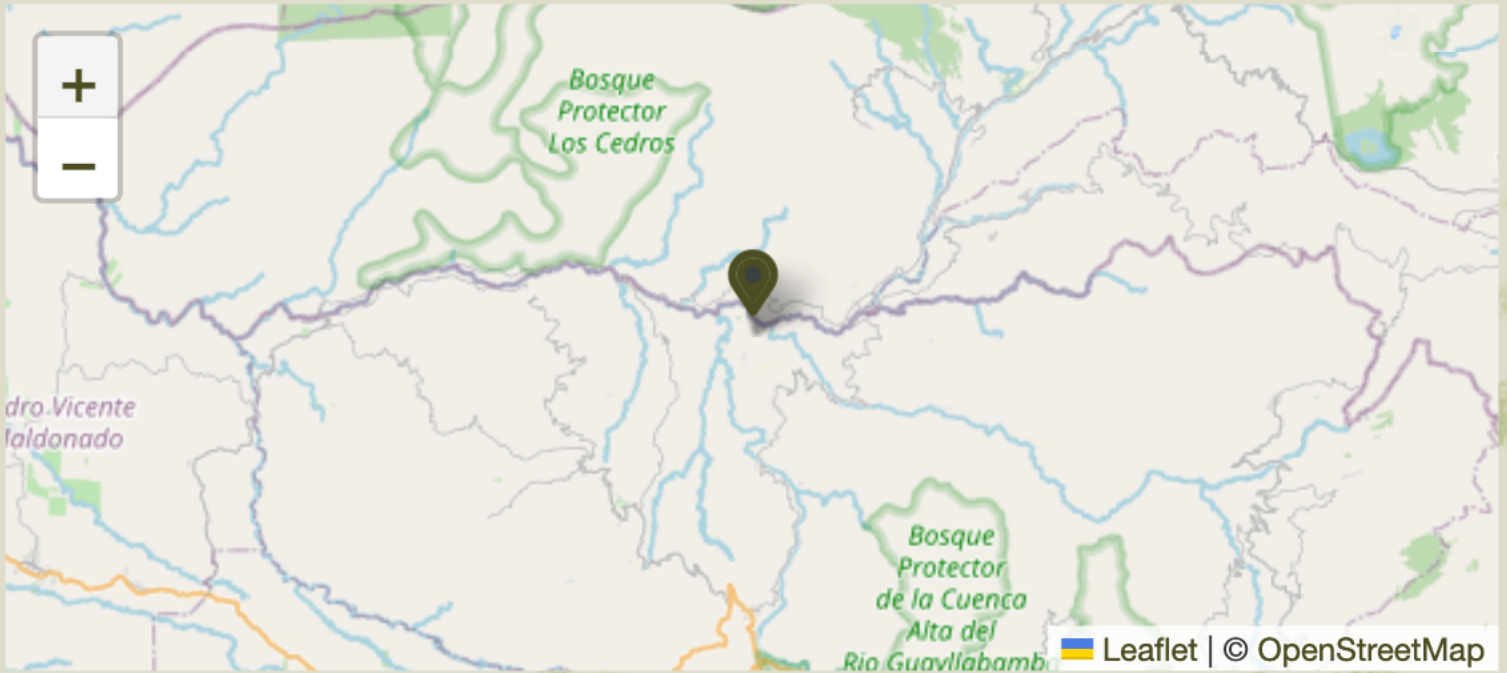

In the region, Nestlé operates an experimental farm where the *Sidra* variety is cultivated, and Fausto chose to focus on this specific variety. Over the past 25 years, he has made significant improvements to his farm, including enhanced agronomic management of the plants, upgrades to drying infrastructure, and the standardization of fermentation processes.

Fausto is a dedicated producer, deeply committed to understanding coffee cultivation and processing to continually enhance the quality of his product. With the help of PECA, he has further refined his methods and introduced additional processing techniques such as the Honey process.
