

# THORVALDO KASTDALEN

**THORVALDO ABRAHAM KASTDALEN  
ESPINA COFFEE GROWER WHO  
KEEPS A FAMILY TRADITION ALIVE  
FROM THE HEART.**

Since childhood, Thorvaldo Kastdalen has been surrounded by coffee plants. His grandfather and father were coffee growers, and although he initially saw it as just another farm activity, he eventually discovered the magic of specialty coffee. What started as a side project soon became his greatest passion.

With eight years of experience in specialty coffee, Thorvaldo has transformed his farm into a model of sustainability and quality. His commitment to efficiency led him to optimize processes without needing vast plantations, successfully producing high-quality coffee with fewer than 2,000 plants per hectare. Moreover, his farm is not just a place for cultivation—it's an ecosystem where livestock and native forests coexist.

Working with Caravela has given him a secure market, and today, his dream is to continue renovating his crops and planting new varieties. When he's not working on the farm, he enjoys resting at home, but his mind is always on coffee.

His message to coffee buyers is clear: every bean represents a continuous effort to improve quality and make coffee a sustainable and special experience.
