NERCY DE JESUS PRADO SANCHEZ

A COFFEE GROWER WHO KEEPS A
FAMILY TRADITION ALIVE FROM THE
HEART.

Nercy has been dedicated to coffee farming for over a decade, continuously improving quality through innovative processes like honey and natural drying methods. She is committed to experimenting with new coffee varieties that adapt well to the unique conditions of her farm.

Her farm stands out for its location, nestled between mountains and surrounded by native forests that provide a rich, biodiverse environment. This natural setting not only enhances the quality of the coffee but also contributes to sustainable agricultural practices.

Caravela has played a crucial role in her journey, providing technical support and a stable market, allowing her to focus on refining her post-harvest processes. This partnership has helped her secure better prices and gain recognition for the excellence of her coffee.

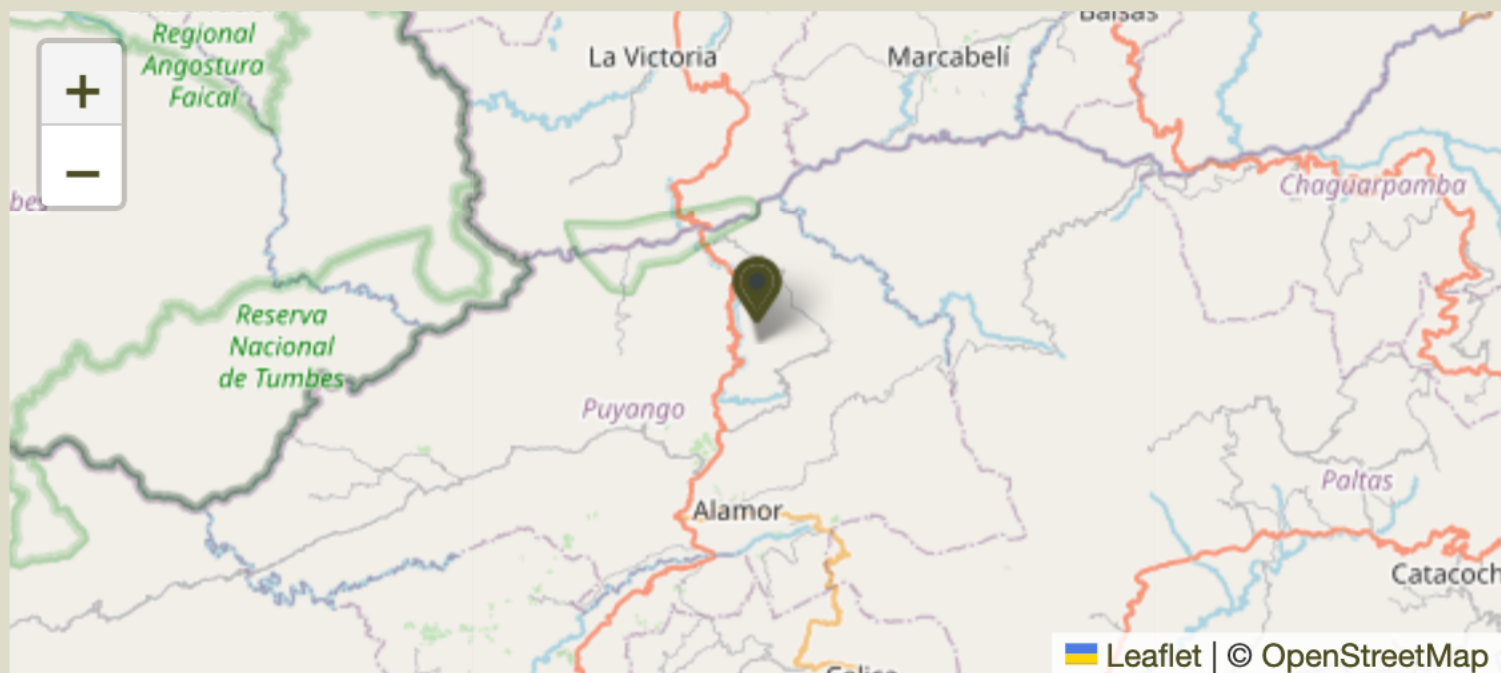

Despite challenges such as adapting to new varieties and maintaining consistency in quality, Nercy remains dedicated to her craft. She plans to further improve her drying facilities and continue implementing sustainable farming practices.

Her message to coffee consumers is clear: by choosing her coffee, they are supporting hard work, innovation, and a commitment to sustainability, ensuring that high-quality coffee can continue to thrive for future generations.
